

*C2000 Teaching
Materials*

Profile of Author

Richard Sikora developed the contents of this CD-ROM, as educational materials for the instruction of design engineers and students.

Richard has more than 20 years' experience in hardware and software design. He has worked on more than 30 different processors in this period, with designs for automotive, aerospace, vending, payment systems and process control.

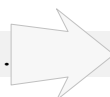

Richard holds a BSc in Electrical & Electronic Engineering and an M.A. in European Marketing Management from the Buckinghamshire College.

Special thanks go out to the following people for their reviews of the material contained on this CD, for their suggestions, clarifications and improvements.

- Dr Frank Bormann
- Christina Peterson
- Huy Pham
- Anjoli Avionn

Thanks also to Luke McQuillan, who designed and compiled all of the materials into a workable CD ROM.
